Room.No.516, Lok Nayak Bhawan,  
New Delhi dated the 3<sup>rd</sup> October, 2017.

**OFFICE MEMORANDUM**

**Subject: Write Up on eAuction system developed by National Informatics Center (NIC)**

The undersigned is directed to forward a write up on e-Auction system developed by NIC to consider the use of e-auction portal (<https://eauction.gov.in>) for use in auctions conducted by various agencies, Public Sector Undertakings (PSUs), Autonomous Bodies etc., while disposing off materials, minerals, etc., related to your Ministries/ Departments. The e-Auction system will substantially enhance transparency and revenue generation.

2. This has been used by a few states like Maharashtra and West Bengal to conduct e-auction-cum-tenders of sand, timber, tendu leaves, etc., to great financial advantage and transparency. It is therefore suggested that departments, agencies, Autonomous bodies, CPSEs, etc., under the Ministry which are required to carry out frequent auctions may be directed to use the portal to ensure better financial outcomes, transparency and efficiency.

3. This issues with the approval of JS(PF C-II).

Brief note on 'Government eAuction System'  
<https://euaction.gov.in>

National Informatics Centre (NIC), Ministry of Electronics & Information Technology, Government of India has developed eAuction software to cater to the electronic forward and reverse auction requirements of the Government departments and organizations. The system is generic in nature and can easily be adopted for all kinds of auction activities. It aims at transparency and non discrimination amongst bidders, by allowing free access to auction documents, clarifications, secure on line submission of quotes from any place on 24X7 basis, using the system through Internet, in a faster, and secure environment adopting industry standard open technologies. The system has been designed taking into account the auction rules followed in various states across the country.

At present the system is being implemented in States like Maharashtra, Odisha & West Bengal, who are using the system extensively whereas few departments of Puducherry, Jharkhand, Uttarakhand, Haryana, etc are also using the system. The same system can be implemented in indented Central Govt procuring entities also. As on Aug, 2017 nearly 5,000 eAuctions including Single as well as Multiple Lots have been conducted using the portal. Auction were conducted on Sand Mining, Timber Sale, Sale of Property, Sale of Tendu leaves, Sale of Unmilled paddy produce, Unserviceable/ Condemned Item, etc.

**Features and Functionalities:-**

The System facilitates two major types of electronic auctions: Forward Auction in which several buyers bid for one seller's goods and Reverse Auction in which several sellers bid for one buyer's order. The system facilitates both single lot and Multi Lot Auctions. Single Lot Auctions are for items that are similar in nature and are auctioned at a single event. In the case of Multi Lot Auctions, similar Items with varying quality / price / other factors are auctioned and each lot will be conducted in parallel.

The Auction parameters like start price, start time, end time, increment/decrement, auction fee, EMD etc., are Template Driven and these parameters can be customised to suit requirements of individual Auctions which adds flexibility within the existing Auction framework.

Approved bidders are eligible to enter into Auction Hall and participate in the live auction. The Bidders Identity is not disclosed and are either masked or hidden till the auction process is completed.

**Security:-** Security is one of the key requirements of Online Auction System. In order to ensure valid participation, bidder credential are verified using two factor Authentication viz username / password and Digital Signature Certificate. The auction documents provided by the department as well as bid documents submitted by the bidder are also digitally signed. In addition, all the bid values submitted by the bidder are digitally signed. This ensures Authenticity and Integrity of the document also can be checked by verifying the signature.

## Brief note on 'Government eAuction System'

<https://euaction.gov.in>

National Informatics Centre (NIC), Ministry of Electronics & Information Technology, Government of India has developed eAuction software to cater to the electronic forward and reverse auction requirements of the Government departments and organizations. The system is generic in nature and can easily be adopted for all kinds of auction activities. It aims at transparency and non discrimination amongst bidders, by allowing free access to auction documents, clarifications, secure on line submission of quotes from any place on 24X7 basis, using the system through Internet, in a faster, and secure environment adopting industry standard open technologies. The system has been designed taking into account the auction rules followed in various states across the country.

At present the system is being implemented in States like Maharashtra, Odisha & West Bengal, who are using the system extensively whereas few departments of Puducherry, Jharkhand, Uttarakhand, Haryana, etc are also using the system. The same system can be implemented in indented Central Govt procuring entities also. As on Aug, 2017 nearly 5,000 eAuctions including Single as well as Multiple Lots have been conducted using the portal. Auction were conducted on Sand Mining, Timber Sale, Sale of Property, Sale of Tendu leaves, Sale of Unmilled paddy produce, Unserviceable/ Condemned Item, etc.

### **Features and Functionalities:-**

The System facilitates two major types of electronic auctions: Forward Auction in which several buyers bid for one seller's goods and Reverse Auction in which several sellers bid for one buyer's order. The system facilitates both single lot and Multi Lot Auctions. Single Lot Auctions are for items that are similar in nature and are auctioned at a single event. In the case of Multi Lot Auctions, similar Items with varying quality / price / other factors are auctioned and each lot will be conducted in parallel.

The Auction parameters like start price, start time, end time, increment/decrement, auction fee, EMD etc., are Template Driven and these parameters can be customised to suit requirements of individual Auctions which adds flexibility within the existing Auction framework.

Approved bidders are eligible to enter into Auction Hall and participate in the live auction. The Bidders Identity is not disclosed and are either masked or hidden till the auction process is completed.

**Security:-** Security is one of the key requirements of Online Auction System. In order to ensure valid participation, bidder credential are verified using two factor Authentication viz username / password and Digital Signature Certificate. The auction documents provided by the department as well as bid documents submitted by the bidder are also digitally signed. In addition, all the bid values submitted by the bidder are digitally signed. This ensures Authenticity and Integrity of the document also can be checked by verifying the signature.

National Informatics Centre (NIC), Ministry of Electronics & Information Technology, Government of India

The system is user friendly, enhances transparency and accountability. The e-Auction ensures complete transparency in auction process. Various MIS reports are available. The system has strong in-built security features including two-factor Authentication with Digital Signature Certificates (DSCs), Usage of SSL, Time Stamping, Role-based User Access and secured hosting. The system has been security audited by Standardisation Testing and Quality Certification (STQC) periodically. The application is hosted in the ISO-27001 certified National Data Centre.

Registration of Department officials with Digital Signature Certificates. The system can be configured for use by an organization at it's apex level, and at multiple subordinate levels, at which auctions could independently be floated.

Enrolment of Bidders in the portal with Digital Signature Certificate. Bidder enrolment is free of cost. Bidders can participate in the auction process only after enrolment.

**Auction Process Flow :-**

The entire auctioning process is to be owned, managed and operated by respective the Auction Inviting Authority only.

Department	Bidder
Auction Creation/Publication including corrigendum Creation/Publication.	Search auctions. Submission Auction Fee, EMD and other documents against interested auctions.
Verification of documents and approval of bidders against eligible auction/lot.	Viewing of approvals
Viewing of Live Auction	Participation in Live Auction in eligible lot on scheduled date and time.
Downloading of results on closing of auction. Finalising of auction.	Viewing of auction evaluation.
Publishing of Award of Auction.	Viewing of auction award.

**Contact us:-**

For any further input/clarifications may mail to [cppp-nic@nic.in](mailto:cppp-nic@nic.in) with subject eAuction.
